EXPERIENCE

Enviro-master Services — Software Engineer / Data engineer

December 2024 - present Full time

Python | SQL/MySQL | php | Git/Github | ERP/SAAS

- Engineered a robust web application for large-scale data migration, leveraging **Python**, **Django**, **MySQL**, and Bash to ensure reliable and repeatable workflows.
- Designed and maintained a custom web application and data warehouse to support financial reporting and process automation using **PHP** and **MySQL**.
- Developed and maintained API clients in **Python** to enable seamless system interoperability and third-party software integrations.
- Led system integration efforts between vendor platforms and internal applications, optimizing data flow and operational efficiency.
- Integrated third-party APIs (e.g., CRM, ERP, analytics platforms) to enable real-time data exchange across key business systems.
- Delivered full-stack solutions for internal dashboards and tools, enhancing operational visibility and driving data-informed decision-making

MDS Communications — Data Engineer / Software Engineer

August 2022 - December 2024 Full time | December 2024 - present part time/ contract

C#/ .NET | HTML/CSS/XML | SQL | TFS

- Designed, developed, and maintained back-end services and data pipelines for real-time campaign management systems using **C#** and **SQL**.
- Architected and implemented complex ETL workflows using SQL Server (**T-SQL**), leveraging stored procedures and scheduled jobs to automate critical data operations.
- Took full ownership of a legacy **C#/.NET** application — delivering new features, improving reliability, and refactoring core components for scalability and maintainability.
- Partnered with non-technical stakeholders to translate business needs into scalable backend solutions, ensuring alignment across teams and project goals.
- Standardized backend workflows and automated recurring tasks, significantly reducing manual effort and minimizing error rates across deployments.
- Built robust server-side logic to support data transformation, validation, and secure cross-system storage, improving data integrity and system interoperability.

California Pools & Landscape — Commercial Superintendent

February 2021 - July 2022

- Oversaw job scheduling, trade partner coordination, quality control, and on-site problem-solving.
- Managed multiple projects simultaneously, ensuring timely delivery and client satisfaction.

SOFT SKILLS

Analytical Problem Solving

Clear Technical Communication

Stakeholder Collaboration

Independent Learning

Pragmatic programming

Workflow Optimization

TECHNICAL SKILLS

Languages & Back-End Tools:

Python | C# | SQL | PHP | .NET |

T-SQL | MySql | Bash |

Powershell

Platforms & Tools:

Git/GitHub | Microsoft SQL Server | ERP/SaaS Platforms | Power BI | TFS | AWS (basic knowledge)

Core Competencies:

ETL Development | API Integration | Backend Architecture
Database Design & Optimization
| System Integration | Business Logic Implementation
Code Refactoring | Data-Driven Systems | Automation & Scalability

Independent Study
January 2022 - Present
(8 - 15 hours a week)

Python, SQL, MySql, AWS
